The screenshot displays a JDA SAP interface with a blue header bar containing the text "jda. PI OR MSAP Run simple". Below the header is a table with four columns, each representing a task selection. The first column is empty. The second column shows "Tsk#: 123", "ALoc: M5", and "Item: 746". The third column shows "Tsk#: 12345", "ALoc: M58-15-F10", and "Item: 7462523948". The fourth column shows "Tsk#: 12345", "ALoc: M58-15-F10", and "Item: 7462523948". Below the table, there are four "Qty:" input fields. The first three are empty, and the fourth contains "27 CS". At the bottom of the table, there are four error messages: "Error", "Error - In", "Error", and "Error - Invalid Qty". Each error message is preceded by a red "X" icon. At the bottom of the screen, there are four "Back" buttons, each in a different color (blue, red, blue, blue).

## VELOCITY RM<sup>2</sup> MIGRATE OR MODERNIZE IN MINUTES

We've got the tools and guides to help you migrate Android into your supply chain.

### Rapid Migration

For three decades, Ivanti® Terminal Emulation, powered by Wavelink, has been the industry standard for mobile-host app connectivity. You've depended on this session persistent connections to keep your workers productive. Terminal Emulation has evolved with your business – from your earliest mobile computing deployments. And when you're ready to migrate to Android, that trusted Telnet client comes with you – through our Velocity framework. Make the transition in minutes with our Rapid Migration tool.
